

**H20**

**Speglingar - Heijastuksia - Reflections**

**19.6 – 30.9 2010**

The Pro Artibus Foundation has produced a water themed summer exhibition for the Archipelago Centre Korpoström. The sea, the water and environmental questions are in focus in this multimedial exhibition featuring everything from photography and water colour-paintings to sculptures and video installations. Most of the artworks are from the foundation's own collections, some are loans from artists.

The reflections in the exhibition are both simplistically concrete and at the same time multifariously abstract. What they all have in common is water. Among the artworks you can find ecological trains of thoughts, as well as family history and art history. These are reflections of our time and society, with all what that implies.

In the exhibition's sculptures, water is portrayed in solidified form. The photographs reproduce the reflection of the water as well as its vivid surface and the video art is able to convey the water's flowing, roaring, lively characteristics both through picture and sound.

The exhibition includes works of following artists: HC Berg, Petri Hytönen, Ann Sundholm, Erik Uddström, Carina Granlund, Gun Holmström, Jan Kaila, Susanna Majuri, Catarina Ryöppy, Elina Julin, Joonas Jokiranta, Jan Jämsén and Marcus Lerviks.

The exhibition will be opened by Professor in Marine Biology Erik Bondsdorff. In the opening dancer Susanne Montag will perform the solo live art performance "Das Wasser in Dir".
